

# APHERESIS THERAPEUTIC OPTIONS IN MULTIPLE DISCIPLINES

December 2<sup>nd</sup> 17:30-18:50 CET

- ◆ **Indications for extracorporeal removal of lipoproteins**  
*R. Klingel (Cologne, Germany)*
- ◆ **Immunoabsorption, an important module for the treatment of autoimmune encephalitis**  
*W. Köhler (Leipzig, Germany)*
- ◆ **Experiences with extracorporeal liver support**  
*A. Santoro (Bologna, Italy)*
- ◆ **Therapeutic apheresis in ANCA associated vasculitis and anti-GBM disease**  
*S. Faguer (Toulouse, France)*

Therapeutic apheresis has been established as valuable therapeutic option in many medical disciplines. The number of indications has increased in recent years. Extracorporeal removal represents a safe and effective treatment for diseases or morbid conditions caused by circulating plasma components. During this webinar experts will review the application of this versatile blood purification technology in the field of cardiovascular diseases, autoimmune encephalitis, liver failure and vasculitis.
